DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 6/29/2006 have been fully considered but they are not persuasive. Applicant argues that the phosphor particles should be protruding from the both sides of the light emitting layer. However, the claim language of claim 7, does not say that the phosphor particles should be protruding from the both sides of light emitting layer. Furthermore, layer 202 in Fig. 4 of George et al. is an insulating layer.

Allowable Subject Matter

1. Claim 8, 9, 13 and 16 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 7, 10-12, 14, 15 and 17 rejected under 35 U.S.C. 102(e) as being anticipated by George et al. (2002/0195931).

Regarding Claims 7, 10, 14 and 17, George et al. disclose a thick film electroluminescent light emitting device having a plurality of layers where in Fig. 4, it is disclosed a first electrode layer 102, a light emitting layer 104 having phosphor particles 106 causing protrusions in the light emitting layer 104, at least one layer including a second electrode layer 204 where the first electrode layer and the at least one other layer conform to the protrusions in the light emitting layer 104.

Regarding Claim 11, in Fig 4 layer 206 of George et al. is a barium titanate layer.

Regarding Claim 12, in Fig. 4, the solvent used in the light emitting layer 104 and the barium titanate layer 206 are the same

Regarding Claim 15, the ratio between the binder material and the phosphor particles in the required area such that the phosphor particles 106 in Fig. 4 protrude from layer 104.

Conclusion

4. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Application/Control Number: 10/519,363

Art Unit: 2826

Page 4

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing

date of this final action.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Fazli Erdem whose telephone number is (571) 272-1914. The

examiner can normally be reached on M - F 8:00 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Wael Fahmy can be reached on (571) 272-1705. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would

like assistance from a USPTO Customer Service Representative or access to the automated

information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
